Detail of Request
Reason for Request

This DR has been developed due to the creation of DR/MCR1084 where MPD 36 was split into two separate processes, namely: MPD 36 1.1 Change of Group MPRN_CoS and MPD 36 1.2 Change of Group MPRN_No CoS.
 All changes to MPD 36 1.1 Change of Group MPRN_CoS were covered in DR/MCR1084
 All changes to MPD 36.1.2 Change of Group MPRN_No CoS are covered in this DR.

Proposed Solution

It became evident through analysis of process, business operation and meeting with relevant business units, that MPD 36 dealt with 2 separate processes. The process differed significantly if a Change of supply was required versus no change of supplier required. As mentioned above, changes to the process which involved a CoS were covered in DR/MCR 1084. Changes were required within the process that did not involve a CoS - i.e. 36.1.2. The changes to be implemented include:

MPD 36 1.2 - Change of Group MPRN_No CoS
Process Flow: MPD 36.1.2 - see attached document. The flow has changed considerably from the original MPD36. All reference to Change of Supplier has been removed from this process. All communication channels between UMR, Supplier and Customer are clearly identified.
 * Supplementary information document has been updated.

Business Changes: * Supplier must distinguish at outset whether a change to Group MPRN involves a change of supplier or not. If no CoS is involved the MP must contact UMR using the new UM 010_CoG.doc template to request change of Grouped MPRN.
 * All communication between end customers (old and new) will take place outside of this process and is outside UMR/ESB Networks remit.
 * A new set of templates have been created to formalise and simplify the process for both MPs and ESNB. There are 3 new templates which are attached in the body of this text
