<b>Contact name</b>	Joan-Edel Smith		
<b>Date Request Raised</b>	28/11/2011	<b>Originating Request</b>	

**Detail of Request**

**Reason for Request**

This request proposes changes to market procedures and market message data codes to support NIE's Revenue Protection processes.

**Proposed Solution**

NIE propose

- Where a RP Inspection Visit detects an unauthorised re-energisation of a domestic premise the RPU will replace the credit meter with a prepayment meter, preloaded with a small amount of credit and disabled from vending on the PRI system. The RPU team will then email the registered Supplier for that premise to notify them that they must submit 017 & 030 market messages to request the re-energisation and (retrospective) replacement of the credit meter with a prepayment meter. The email will contain an appointment ID for use on the 017(E01) & 030(K05) market messages. RPU will complete the 017 & 030 orders and the 332 market message will be sent to the Supplier as confirmation of the meter exchange.
- The 131[C1] market message that is sent on completion of the RP Inspection Visit will have
  - Work Type Code = W402 - RP Inspection Visit
  - Outcome Reason Code = C008 - Revenue Protection Issue
 This requires the Code Value 'W402' on Data Item 'Work Type Code' to be changed to 'Valid in NI' in the HBL Data Code.
