PART 1 DETAIL OF DISCUSSION REQUEST/MARKET CHANGE REQUEST:							
Requesting Organisation(s)	NIE			Originating Jurisdiction	NI		
Contact name	Joan-Edel Smith						
Date Request Raised	14/06/2011		Originating Request				
Detail of Request							
Reason for Request							
Based on the ES design market message structure, a Supplier can derive the type of meter operation from the DUoS Group (T05x indicates Prepayment). This Discussion Request proposes that a new field - Meter Operation Mode (Prepayment / Credit) is added to the 301, 301N, 320, 320W, 332 and 332W market messages. This will allow a Supplier to explicitly identify the type of meter operation, specifically Prepayment or Credit. Note: Prepayment could be installed but operating as credit.							
Proposed Solution							
NIE propose to add a new field to the 301, 301N, 320, 332, 320W and 332W Market Messages. New field is optional on all messages. Field Name = Meter Operation Mode Data Code values = Prepayment or Credit Field Position in market messages: 301 - "Meter Point Details" segment 301N - "Meter Point Details" segment 332 - "New Meter ID" segment. Not Required for "Removed Meter ID" or "Retained Meter ID" segments 332W - "New Meter ID" segment. Not required for "Removed Meter ID" or "Retained Meter ID" segments 320 - "Meter ID" segment 320W - "Meter ID" segment.							
Classification of Request							
Harmonisation Impacting			X	Harmonisation Baseline Version No.		TBD
