**PART 1 DETAIL OF DISCUSSION REQUEST/MARKET CHANGE REQUEST:**

<b>Requesting Organisation(s)</b>	NIE	<b>Originating Jurisdiction</b>	NI
<b>Contact name</b>	Joan-Edel Smith		
<b>Date Request Raised</b>	21/03/2011	<b>Originating Request</b>	-

**Detail of Request**

**Reason for Request**

This Discussion Request proposes the creation of a number of new Register Types, Timeslot codes and MCC codes for the NI Market as part of the Enduring Solution.

**Register Types/Timeslot Codes**  
NIE are to create a new set of Register Types and associated Timeslot codes as part of the Enduring Solution. The reason for the creation of this new set of Register Types/Timeslot codes is to more accurately define the types of registers and the time periods for measuring consumption that exist within the NI Market and to support the MCC codes that are proposed for the Enduring Solution.

**MCC Codes**  
NIE are to create a new set of MCC codes as part of the Enduring Solution. The reason for the creation of this new set of MCC codes is to rationalise the set of MCC codes that will be available to Suppliers so that where possible a single MCC code will describe a unique register configuration. The proposed set of MCC codes will support the tariffs that will be available to Suppliers in the Enduring Solution and will reflect the Register Types and the time periods for measuring consumption that exist in the NI market.

**Proposed Solution**  
This Discussion Request introduces the set of Register Types, Timeslot codes and MCC codes listed in the attached document and will supersede any previously published codes.
