Date	Version	Reason For Change			Version Status		
30/03/2011	v1.0	Initial version issued to HWG			Final		
<b>PART 1 DETAIL OF DISCUSSION REQUEST/MARKET CHANGE REQUEST:</b>							
Requesting Organisation(s)	NIE		Originating Jurisdiction	NI			
Contact name	Joan-Edel Smith						
Date Request Raised	28/03/2011		Originating Request				
<b>Detail of Request</b>							
<b>Reason for Request</b>							
Current draft retail market procedure for the enduring solution for Non-Interval readings (MP NI 104 NHH Readings Processing) states the following: "The re-calculated EAC will be used from the point of re-energisation unless the period of de-energisation exceeds 24 weeks in which case a class average EAC will be used." It is now proposed to re-calculate the Estimated Usage Factor (EUF) at the point of re-energisation irrespective of the period of de-energisation. The rationale for this Discussion Request is harmonisation with the arrangements in RoI.							
<b>Proposed Solution</b>							
The EUF calculated for re-energised sites will be calculated in the normal way irrespective of the length of the preceding period of de-energisation, i.e. a default value will never be applied following re-energisation. EUF is derived by summing the weighted actual usage factors applicable in the previous 365 days.							
<b>Classification of Request</b>							
Harmonisation Impacting			Harmonisation Baseline Version No.		TBD		
NI Specific	X	RoI Specific	Operational	Date of Transfer from HWG			
<b>Scope of Request</b>							
Design Documentation	Business Process	Market & MP Systems	Market Gateway (Hub)	MPCC/ EMMA	Schema	Web Forms	Extranet
<b>Harmonisation Baseline Documents impacted by Request</b>							
Market Messages:	No impact						
Data Definitions:	No impact						
Data Codes:	No impact						
RoI MM Guide:	No impact						
NI MM Guide:	No impact						
Harm. Impact (RoI):	No impact						
Comment:
