

MIG Design Discussion Request

Discussion Request Number	Title	Priority
DR 0007	<i>Defaulting Business Reference on Web forms</i>	<i>MED</i>

Name of Requesting Organisation	TIG
Contact name	N/A
Date Request sent to ESB MOIP	11/03/04

Detail of Discussion Request	
<p>Arising from the demonstration of web forms at TIG on Feb 19th Suppliers requested ESB MOIP to investigate possibility of having the Business Reference field defaulted on the web forms based on a based on combination of message number, date and timestamp.</p> <p>At TIG of March 11th 2004 ESB MOIP stated that change would not be incorporated into version of Webforms to be built for end of March 2004. The prime reason for not including the default value was that it was the view of ESB MOIP that this would see business logic being included in the web forms which was a deviation from the original scope of the web forms</p> <p>However subsequent to the TIG it was agreed to implement the requested change</p>	
Reason for Discussion Request	
<p>Suppliers felt that the provision of a default value (which could be over-ridden) would be of benefit to suppliers – particularly in the case of infrequently used messages where there would not be an obvious business reference to be used instead of the proposed default value</p>	
Market Design Documents impacted by Request	
<p>None – will be reflected in 'as built' version of Webforms</p>	
Date of MIG where discussed	15/04/04
Change Request xref (if applicable)	NONE – CLOSED on basis that requested change will be reflected in as built version of Webforms
