<b>Detail of Discussion Request</b>	
<i>Load Profile should be included on message 101P and 101 provided as part of the New Connection.</i>	
<b>Reason for Discussion Request</b>	
<i>At present in the CoS scenario the field Load Profile is provided from early in the process (with receipt of the 102/102P message). In a new connection scenario this information is not available until after the registration is complete and meter details are sent on message 332. This is felt to be too late</i>
