

MIG Design Discussion Request

Discussion Request Number	Title	Priority
DR 0044	NQH De-energisation	High

Name of Requesting Organisation	<i>Energia</i>
Contact name	<i>Edward Barr</i>
Date Request sent to ESB MOIP	<i>20/05/04</i>

Detail of Discussion Request

This DR proposes to send message 306 for all NQH de -energisation

Reason for Discussion Request

There is no definite de-energisation message as the 332 is a general message for meter works.. There could be confusing when building processes to handle market flows e.g. with a change of metering from NQH to QH also has all the NQH metering removed and the QH metering will be in a 331 message.

Market Design Documents impacted by Request

Ver 4.1 of Messages Implementation Guide – Meter Works

Ver 4.1 of MPD 9 – De-energisation
