

Form A – MIG Design Discussion Request

Discussion Request Number	Title	Priority
DR 0079	PROVIDE A NEW MARKET MESSAGE TO TSO_SSA, WITH CUSTOMER DETAILS, ON CHANGE FROM NQH TO QH.	High

Name of Requesting Organisation	SSA/TSO
Contact name	Mary d'Arcy
Date Request sent to ESB MOIP	18-May -2005

Detail of Discussion Request

An issue has been identified with the Market Design for supporting the ESBNG when communicating the completion of a QH meter works job. The issue arises when ESB Networks complete a NQH to QH exchange.

In this case ESB Networks would send a 332 message and a 331 message to a Supplier who would already have the end customer information for the site.

The ESBNG would only receive the 331 message and would not have the end customer information. They would receive this message because the site had become QH.

A new Market Message is requested to be sent to TSO/SSA to provide the ESBNG with certain customer information at the same time that a 331 is issued. The new message would relate to the NQH-QH meter works jobs to be completed.

The required fields are:

Customer, Customer title,
MPRN at the site,
Site address, Name, Region, Country, (ie full Address)
New MIC
Voltage
Connection designation, i.e. T or D
Supplier Details

(When the 331 message is received by the ESBNG, this would act as a confirmation that the work has been completed).

Reason for Discussion Request

This data is essential in order for TUOS Operations to be able to set up the Site as a QH site. It is proving to be a problematic process as without this data being immediately available, there are a lot of manual interventions and emails required.

Initially the agreement between Networks and ESBNG was that that ESB NG would be given the data via a business process. Currently this is not being actioned as agreed.

Newly drafted WP 0010 exists to provide the ESBNG with a report to communicate the completion of a QH meter works job. This is not a satisfactory ongoing solution given the volume of changes going forward.

The Current Working Practise will tide us over until the automatic messaging is available.
