

Form A – MIG Design Discussion Request

Discussion Request Number	Title	Priority
DR 0086	PROVISION OF GENERATOR MESSAGES TO SUPPLIER MPCC	High

Name of Requesting Organisation	ESB Networks
Contact name	Sharon Tobin
Date Request sent to ESB MOIP	29 August 2005

Detail of Discussion Request

As raised in discussions with market participants it is proposed to modify the market systems to allow messages intended for a Generator (341*, 504 and 504s**) to be sent to a nominated Supplier.

Changes will be made to the market systems to enable messages which currently issue to a Generator's MPCC (or which do not currently issue as the Generator has no MPCC in place) to issue to the MPCC of a nominated Supplier.

Generators who wish to avail of this facility must first contact MRSO to notify them of the requirement (See working practice 12 – draft for details of the information to be provided).

Q:\Market Design\
Design documentation

For each Generator who nominates a Supplier to receive their messages a period of testing will be required to ensure that the Supplier can receive those messages.

Resends of messages will be sent to the nominated Supplier's MPCC.

* 341 QH Meter Daily Data

- The scope of this DR is for the processed QH meter readings data for Export Channels.
- This message is not sent to TSO for Export Channels.

* * 504s Re-aggregation messages

- The re-aggregation messages (504S) will issue to the nominated supplier on CD and specifically not via the MPCC

Market Design Documentation impact

Comments to be added to the relevant market message guides to highlight that these messages may now go to a nominated Supplier

Section 3.4 to be added to MPD15:

Where a Generator has nominated a supplier to receive QH data on its behalf, and both parties have completed their obligations as specified in Working Practice 12, then all 341 messages for that generator will issue to the Supplier.

Section 5.11 to be added to MPD 16:

Where a Generator has nominated a supplier to receive QH data on its behalf, and both parties have completed their obligations as specified in Working Practice 12, then all aggregation and re-aggregation data will issue to the Supplier.

Reason for Discussion Request

To facilitate Generators who wish to nominate a Supplier for the receipt of market messages.
