

Form A – MIG Design Discussion Request

Discussion Request Number	Title	Priority
<i>DR 0100</i>	<i>Addition of codes to replace IID</i>	<i>Medium</i>

Name of Requesting Organisation	<i>ESB Networks</i>
Contact name	<i>Sharon Tobin</i>
Date Request sent to ESB MOIP	<i>05/01/06</i>

Detail of Discussion Request
<p><i>At present, the rejection reason IID (invalid/incomplete data) is widely used throughout the Retail Electricity Market. This covers a range of processes including:</i></p> <ul style="list-style-type: none"> <i>• New Connections</i> <i>• Change of Supplier</i> <i>• CoLE</i> <i>• Change of Customer Details</i> <i>• Meter Works</i> <i>• Re-energisation</i> <p><i>The use of a code such as this is inevitable; however, it should be limited to a small number of cases. With this in mind it is proposed to add the following codes to the Market XML Schema:</i></p> <ul style="list-style-type: none"> <i>• UDI – User Detected Error (to be used where a user in MRSO detects an error while a registration request is being processed - following consultation with the requesting supplier the request may be rejected.)</i> <i>• MAE – Meter Point Address Error</i> <p><i>In addition to this earlier DRs and DRRs have proposed the introduction of two further codes:</i></p> <ul style="list-style-type: none"> <i>• CNE – Customer Name Error</i> <i>• OAE – Other Address Error</i> <p><i>which will be used to limit the occurrence of IID as a rejection reason.</i></p> <p><i>No changes to business validation logic is currently proposed outside that detailed in DR 94 and DRR 97, however, once the two new codes have been introduced to the schema, subsequent Discussion and Change Requests may be raised to facilitate their use.</i></p>

Reason for Discussion Request
<i>To limit the use of IID in the market and replace it with more meaningful codes. It is proposed to add these codes to the schema now, before they are intended to be used, to limit the frequency of schema</i>

releases, which have a significant impact on some participants.
