

Form A – MIG Design Discussion Request

Discussion Request Number	Title	Priority
DR 0066	Addition of new Code 'CoG' Change of Group MPRN	Med

Name of Requesting Organisation	ESB MOIP
Contact name	Nat Williams
Date Request sent to ESB MOIP	

Detail of Discussion Request	
<p>Analysis of scenarios, such as LA boundary changes, where it is found a TMPRN should move from one GMPRN to another reveals the need for an additional Unmetered MPD.</p> <p>Whilst initial thoughts regarding this process are being documented for circulation in future correspondence it is becoming clear that whilst ESB Networks will be able to update their systems regarding the new relationship there is a need for a communication to the relevant Supplier communicating this new relationship.</p> <p>As such, a new Transaction Reason Code "CoG" should be added to the 700 Technical Characteristics Market Message to reflect the Change of Group MPRN.</p> <p>The rationale behind the issuing of this DR prior to the MPD is that even though the above is a relatively small change, to an existing field in an existing message, it would require a small update to the xml schema. Due to the timelines involved in making Schema changes it is proposed that this DR proceed with an understanding that no message would ever be issued with that code until the development and implementation of the new MPD has been agreed. This would enable a swift implementation of the MPD without delay waiting for further Schema releases.</p>	
Reason for Discussion Request	
To incorporate functionality to support the unmetered design.	
Market Design Documents impacted by Request	
Market XML Schema V 4.3.1 Market Message Implementation Guide - Unmetered v4.4 Data Codes V 4.4	
Date of MIG where discussed	<to be completed by ESB MOIP>
Change Request xref (if applicable)	<to be completed by ESB MOIP>
