

Form A – IGG Design Discussion Request

Discussion Request Number	Title	Priority
DR 0119	ADD VALIDATION TO USE OF REGISTERED COMPANY NUMBER-2 PHASE APPROACH	Med

Name of Requesting Organisation	RMDS
Contact name	Cormac Madden
Date Request sent to RMDS	25-08-06

Detail of Discussion Request
<p><u>Context</u> As discussed at the IGG Meeting on 10.08.06, this draft of the DR is on the basis of a 2 phase approach:</p> <p>Phase 1: Implement the non-message changes e.g. the logic and system changes only Phase 2: Implement the schema changes to coincide with the SEM schema release for November '07.</p> <p><u>Background</u> In a Change of Supplier request, it is possible that a difference in spelling of the customer name e.g. due to a typing error or a rebranding by the customer can cause a Change of Legal Entity to be inferred where none has occurred. The processing in these cases is more complex and may lead to delays – especially if the MIC of the site is 100 kVA or over and a connection agreement is issued and its return awaited.</p> <p>The Registered Company Number was originally included in the market data model for this purpose. To prevent the occurrence of erroneous inferring of Change of Legal Entity it is proposed to add validation surrounding Registered Company Number to the following Market Messages for sites over 100 kVA:</p> <ul style="list-style-type: none"> • 010 – Registration Request • 013 – Change of Customer Details <p>The logic rules are outlined in the attached document. This data item is already included as part of the market data model, although presently no validation is carried out on it.</p> <p>As part of this change, ESB Networks propose to provide to each Supplier a list of companies over 100 kVA, as well as their associated Registered Company Number, following a data population exercise to be carried out by ESB Networks.</p> <p>As discussed at the IGG Meeting on 10.08.06, it is proposed to implement the changes over two phases. The non-message changes would be scheduled for mid 2007 and the message changes are proposed to coincide with SEM go-live in November 2007.</p> <p><u>Schema Changes (Now proposed for Phase 2 coinciding with SEM go-live)</u></p> <ol style="list-style-type: none"> 1. Addition of Customer Name Segment to the 116 and 116R messages 2. Change RCN validation in schema to A(6) <p>To prevent ESB Networks from inferring CoLE for sites over 100 kVA where a name is mis-spelt, or</p>
