Part 1: Detail of Defect & Proposal
<p>MPD 7 needs to be updated to correctly represent the flow of messages. The current process indicates that sending message 331 is dependent on receipt of the acceptance to trade (Manual Message 007) from SSA. This is not the case, 331 will issue to the supplier once the registration has been accepted.</p> <p>MPD also needs to be clarified to indicate that aggregation will commence for import data once registration is accepted. Aggregation for export data will commence once the generator has been accepted to trade by SSA.</p>
