Part 1: Detail of Defect & Proposal
<p>Editing and saving of messages in Webforms causes a new record to be added to the outbox (as opposed to updating the edited record), thus leaving duplicate records in the outbox. On sending these, the original record will be taken as correct with each of the updated/corrected records being rejected as duplicates.</p> <p>Change required to the MPCC WebForms as follows. If the user loads a message using the LOAD MESSAGE button, then on saving this message using the CREATE MESSAGE button the filename will default to the original filename.</p>
