

Defect Resolution Request

Defect ID	Title	Priority
DRR 0043	Correction to MPD 8	High

Defect	
Date raised	11/10/04
Contact name	Sharon Tobin - ESB MOIP
Date issued to MIG	

Part 1: Detail of Defect & Proposal

MPD 8 step 13, 14 of process description states "For DUoS billing purposes the new connection characteristics will take effect on the first day of the month of the next DUoS billing period". This is not quite accurate.

Changes in MIC will take effect from the next DUoS Billing period, while a change in DG for customers over 30kVA will take effect as at the move in date of the new DUoS Group (plus one), which is also the start of a billing period. The MPD should be updated to reflect this.

'DSO will provide any changes to Connection Characteristics to MRSO. Changes in MIC and, for customers over 30 kVA, changes to DUoS Group will take effect from the start of the next billing period. For DUoS Group changes this will be an interim billing rather than a DUoS Billing. Changes in DUoS Group for customers under 30 kVA will take effect from the start of the current billing period.'
