

## Defect Resolution Request

Defect ID	Title	Priority
DRR 0052	Clarifications to Supplier Communication resulting from Billing and invoicing	Med

Defect	
Date raised	29/10/04
Contact name	Sharon Tobin - ESB MOIP
Date issued to MIG	08/11/04

Part 1: Detail of Defect & Proposal
<p>1) Section 4.7 of the Supplier communication resulting from DUoS Billing &amp; Invoicing V1.1 states that "Should the special read be less than the previous estimated read, it will result in:            ...withdrawal of any affected meter readings - Market Message 300W            ...re-estimation of affected meter readings - Market Message 300"</p> <p>Although the text above relates exclusively to the withdrawal and replacement of special reads for the avoidance of doubt it is proposed to updated Section 4.9 (Reversal of NQH readings) with the following text:</p> <p><i>'Estimated readings can be sent in a number of market messages including 300, 310, 320, 305, 306, 307, 332 and the withdrawal of any affected meter readings will be performed on a corresponding withdrawal message.</i></p> <p><i>Likewise re-estimated readings can be sent in 310, 320, 300, 305, 306, 307, 332.'</i></p> <p>Similarly, MPD 14 makes reference to the messages on which supplier can expect to receive a replacement reading (Section 3.11). This list should be updated to include message 305.</p> <p>2) Updates required to Section 5.4 of the Supplier Communication resulting from billing and invoicing document to clarify that MIC surcharges apply to NQH MD sites and all QH sites. All references to NQH sites in section 5.4.1 will be updated to NQH MD.</p>
