

## Defect Resolution Request

Defect ID	Title	Priority
DRR 0068	Population of settlement class on market message 102P	Low

Defect		
Date raised	21/12/04	Contact name Sharon Tobin - ESB MOIP
Date issued to MIG	21/12/04	

### Part 1: Detail of Defect & Proposal

**Defect**

During IPT a defect was discovered with the population of the field settlement class on Market Message 102P. Where a site is QH this field will be incorrectly set to a value of N. The field will be correctly populated on market message 102. The mapping rules on Market Message 102P need to be remedied to ensure the field is correctly populated.

**Proposal**

Given the tight timeframes until Go-Live on Jan 4<sup>th</sup> MOIP are proposing to defer resolution of this defect until after go-live. In this scenario MPS would continue to receive an incorrect value on the 102P which could be over-written with the correct value on the 102 when it arrives.

### Impact of Defect on Market Processes

**Proposal**

Proposal Type (please tick one)

New/modified working practice  Amend market design  No action  Other

**Description**

**Identification of Baseline Products Impacted**

None

### Part 2: IMPACT ASSESSMENT & DECISION:
