

## Defect Resolution Request

Defect ID	Title	Priority
DRR 0079	Modification to MPCC Access database	

<b>Defect</b>			
Date raised	21/02/05	Contact name	Roger Gough ESBIE
Date issued to MIG			

### Part 1: Detail of Defect & Proposal

The MS Access database provides suppliers with valuable information on all messages sent and received by a supplier. If this could be modified to include the market participant business reference number and the MPRN it would add greatly to the ability of suppliers to track messages, in particular the registration messages. At present you can see how many 010 messages you have sent and how many 102, 102P, 105 messages you have received but it does not give you the information to "Link" these messages together. The market participant business reference number would allow you to do this.

### Impact of Defect on Market Processes

Increased information available to suppliers.

### Proposal

**Proposal Type** (please tick one)

New/modified working practice    
 Amend market design    
 No action    
 Other

### Description

### Identification of Baseline Products Impacted

**MPCC to be modified:**

There are two fields to be added identified to be added: Business Ref. Num. and MPRN Num.

**Business Ref. Num. is easier to change as there is only one per message. It will require changes to two eWays and two ETDs. Changes will also be made to the database. The estimate of this work including test and deployment is 8 days work.**

**The MPRN Num. change is more complex as there is multiple MPRNs per message. A new table and new eWay components will be required. The deployment procedure will be more complex also. This will add an additional 8 days work to the above.**

**So to summarise:**

1. Addition of Business Ref. Num. only = 8
2. Addition of Business Ref. Num. and MPRN Num. = 16

### Part 2: IMPACT ASSESSMENT & DECISION:

#### Summary of Impact Assessment

#### Modifications Included

#### Reason for Modifications

### DECISION
