| Date raised | 11/03/05 |
| Contact name | Tim Cragg - ESB MOIP |
| Date issued to MIG | |

Part 1: Detail of Defect & Proposal

A number of 210 customer read messages with the same MPRN, read date and reading have been received. This has facilitated the requirement for Networks to be able to reject 210 messages where an identical reading and read date is received on a second 210. It is proposed to use MM 303R with reject reason IA – Invalid Action for this purpose.

This code value is already applicable on 303R to reject customer reads for MD Sites. It is proposed to extend the codes used to the scenario noted above. The message guide must be updated accordingly.

Impact of Defect on Market Processes

Update to Market documentation and Networks systems to be able to accept the code in this scenario.
