

Defect Resolution Request

Defect ID	Title	Priority
DRR 0094	MPCC not generating error message for badly formed XML	High

Defect			
Date raised	13-10-2005	Contact name	
Date issued to IGG			

Part 1: Detail of Defect & Proposal

Messages passed to the MPCC which do not contain valid XML will not presently result in the creation of an error messages in the archive/error folder due to a defect in the MPCC.

Impact of Defect on Market Processes

While failure to correct this defect would result in Market Participants being unaware that a message created by their system was invalid and had not issued this defect will not have significant impact on the operation of the market owing for the following reasons:

- MPs who use the webforms to create messages cannot create a badly formed message
- MPs who are using their own back end systems to generate messages have been operating successfully since Go-Live without experiencing difficulties on this front

Proposal

Proposal Type *(please tick one)*

New/modified working practice

 Amend market design

 No action

 Other

Description

The proposal is to create an error record in the Access database where such a badly formed message is created by a market participant.

Identification of Baseline Products Impacted
