

Defect Resolution Request

Defect ID	Title	Priority
DRR 0097	Update to the validation of Notification Addresses on the 010, 013, 016 and 017 messages	Medium

Defect		
Date raised	01-12-2005	Contact name
Date issued to IGG		Leonie McCrann-ESB Networks

Part 1: Detail of Defect & Proposal

Recent issues with the population of Notification Addresses on inbound messages to Networks / MRSO have prompted ESB Networks / MRSO to propose the following additional validations on receipt of Notification addresses on messages 010, 013, 016 and 017.

Addition of validation to reject the message where the message contains a Notification Address in the Republic of Ireland but that address does not contain a valid value for County – Ireland (As below).

- If Notification address is in Republic of Ireland Check if County - Ireland field is populated. If not reject with OAE (Other Address error – new code to be added to data codes)

ESB Networks also propose to include the following validation for Notification Address:

Notification Address sent in on 010, 013, 016 and 017 messages must include at least **one** of the following fields. If they do not it is proposed to reject the message for OAE.

- Address line 4
- Address line 5
- City.

This means that for Notification Addresses Suppliers would need to provide the following:

- Street
- One of Address line 4, Address line 5 or City.
- County – Ireland if the Address is in the Rep of Ireland
- Country

Recent issues with the population of the Notification Address on the 010, 013, 016 and 017 messages have highlighted a defect in the system validation of these messages. To bring the system processing of notification address on these messages in line with the Market Message Implementation Guide the following validations must be added to the system:

- Check if both county and County_state fields are populated. If so reject the message with OAE
- If country does not equal IE and county - Ireland is populated, reject the message with OAE

Impact of Defect on Market Processes

New rejection reason OAE – Other Address error. Rejection of Market messages 010 / 013 / 016 and 017 where they fail the above validations.
