

Code Change Request

1. Applicability.

This form invokes an accelerated change process to introduce new code values for non-transactional codes that already exist in the retail market design.

To be eligible for this process, a code must:

- already exist in the retail market design:
 - Be in the current version of the market design in ARIS
 - Be in the current version of the XML schema
- Be a non-transactional code:
 - The current version of the XML schema does not list the permissible values of the code i.e. schema validation is on length, type and/or format only
 - The code is sent on messages outgoing from ESN only i.e. not present in Web-forms
 - Market participants do not need to process the code in their back end systems in order to meet their license and/or assurance obligations

Date	Version	Reason for Change
29 th July 2013	1.0	Code Change Request created for issue to Market.

Background

The Unmetered Type Code appears on the 700 and 701 Market Messages. These are non-transactional codes. The current version of the XML schema does not list the permissible values of the code i.e. schema validation requires only that the value is of maximum length 8 and of type string.

The Lamp Types detailed below are being submitted by Councils on application forms and UMR cannot process these as the Lamps are not included in the ZDT_UM_FACTPARAM table.

ESB Networks now wishes to add these new lamp types to the ZDT_UM_FACTPARAM TABLE using existing Unmetered Type Code SONE into which new wattages have been introduced

Description of New Codes

Type UM	Actual kWh	Rate category	Billable kWh	Power Factor
SONE	250W	DG-3 D2D	270W	0.85
SONE	250W	DG-3 D2M	270W	0.85
SONE	250W	DG-4 D2D	270W	0.85
SONE	250W	DG4 D2M	270W	0.85

Reason for New Code	
These new lamp types are being submitted by Local Authorities on application forms and UMR cannot process them as the Lamps are not included on the above table.
