Details of CoBL Change Request

Background Reason for Change

The Unmetered Type Code appears on the 700 and 701 Market Messages. These are non-transactional codes. The current version of the XML schema does not list the permissible values of the code i.e. schema validation requires only that the value is of maximum length 8 and of type string.

The Lamp Types detailed below are being submitted by Councils on application forms and UMR cannot process these as the Lamps are not included in the retail market's Central Market System

Description of Change

ESB Networks now wishes to add these new lamp types to the retail market's Central Market System using existing Unmetered Type Code LED, CFL, CCTV into which new wattages have been introduced.

Appendix A

CoBLCR Criteria

This form invokes an accelerated change process to introduce new code values for non-enumerated (non schema validated) codes/fields that already exist in the retail market design OR corrections or amendments to the CoBL document only (i.e. non conformances that are limited to non technical changes). Coded value changes will be implemented outside of a market release by the DSOs.

Changes to the CoBL will be effected through a Co-ordinated Minor Market Release (Co-MMR) i.e. documentation change to the baseline only.

Code Changes:

To be eligible for this process, a code field must:

- *already exist in the retail market design:*
 - *Be in the current version of the market design*
 - *Be in the current version of the XML schema*
- *Be a non-enumerated code:*
 - *The current version of the XML schema does not list the permissible values of the code i.e. schema validation is on length, type and/or format only not on actual code.*
 - *The CoBL contains the list of values for informational purposes.*
 - *Market participants may or may not process the code in their back end systems in order to meet their licence and/or assurance obligations.*
 - *If the code is used, the CoBLCR forms the communication mechanism for informing Market Participants of changes or additions to codes within the CoBL.*

Non Conformances

- *A CoBL non conformance can be defined as a textual error within the CoBL documentation. It will NOT involve any change to the XML schema.*
- *Examples of a CoBL Non Conformance include but are not limited to:*
 1. *Data item omissions from the data item tab*
 2. *Inconsistent representation of data items across tabs*
 3. *Missing Attributes/information from data items.*

Cosmetic inaccuracies (spelling, grammar etc)
