

MCR		1004	Supplier to use the MCC on 010 New Connection Registration Market Message as agreed by customer at the New Connection Application stage				<i>Priority</i> Fast Track	
Harmonisation Status			CLOSED - Approved			CR Status	Approved	
						Status Date	26/10/2010	
Date	Version	Reason For Change					Version Status	
05/10/2010	v1.0	Initial Version					Final	
13/10/2010	v2.0	Converted to MCR - No changes from associated Discussion Request					Final	
PART 1 DETAIL OF DISCUSSION REQUEST/MARKET CHANGE REQUEST:								
Requesting Organisation(s)	NIE			Originating Jurisdiction		NI		
Contact name	Joan-Edel Smith							
Date Request Raised	15/09/2010			Originating Request		DR 1004		
Detail of Request								
Reason for Request								
<p>Currently in NI the Supplier agrees the Meter Configuration Code (MCC) with the customer and must provide it on the New Connection Registration Request (010). The registration request will be rejected if the code is not present or is not consistent with the MIC. This Discussion Request proposes that the customer agrees the MCC with NIE as part of their application for a new connection and that the agreed MCC is displayed on the Market website - this agreed MCC will be the MCC used by NIE for validating a New Connection Registration. It will no longer be mandatory for a Supplier to provide the MCC on the 010 New Connection Registration request.</p> <p>This proposal will further harmonise the 010 market message population and validation for a New Connection Registration and the Meter Point Data displayed on the Market website for a new connection. As the MCC is agreed by the customer with NIE at the new connection application stage it will no longer be mandatory for a Supplier to provide a MCC on the 010 New Connection Registration market message thus eliminating 010 New Connection Registration rejections because a MCC is not present or where populated is not consistent with the MIC.</p>								
Proposed Solution								
To populate the Market website with the MCC agreed by the customer with NIE at the New Connection Application stage. To change the validation so that it is not mandatory for a Supplier to provide the MCC on a New Connection Registration.								
Classification of Request								
Harmonisation Impacting			X		Harmonisation Baseline Version No.		TBD	
NI Specific		RoI Specific		Operational		HWG Transfer Date		
Scope of Request
