Date	Version	Reason For Change						Version Status		
04/10/2010	v1.0	Initial Version						Final		
13/10/2010	v2.0	Converted to MCR - No changes from associated Discussion Request						Final		
PART 1 DETAIL OF DISCUSSION REQUEST/MARKET CHANGE REQUEST:										
Requesting Organisation(s)		NIE				Originating Jurisdiction		NI		
Contact name		Joan-Edel Smith								
Date Request Raised		15/09/2010			Originating Request		DR 1009			
Detail of Request										
Reason for Request										
<p>This Discussion Request proposes that NIE will not adopt a cleansed address indicator process for Meter Point Address maintenance when a Change to Customer details market message 013 is received. The adoption of this process would have meant that once a cleansed address indicator had been set against a site then any subsequent Meter Point Address changes would have been rejected automatically. The Discussion Request therefore proposes to remove the cleansed address indicator and the automatic rejection of Meter Point Address changes on an 013. Instead, NIE will review all Meter Point Address change requests on an 013. Suppliers may still have Meter Point Address changes rejected but only after review by NIE. NIE retains the right to accept or reject any changes to the Meter Point address.</p> <p>Further harmonisation</p>										
Proposed Solution										
Remove the validation on 013 market message for NIE to mark a Meter Point Address as "cleaned" and to automatically reject.										
Classification of Request										
Harmonisation Impacting				X		Harmonisation Baseline Version No.			TBD
