13/10/2010	V2.0	Converted to MCR - Updated with further details	Final

PART 1 DETAIL OF DISCUSSION REQUEST/MARKET CHANGE REQUEST:

Requesting Organisation(s)	NIE	Originating Jurisdiction	NI
Contact name	Ann Ferguson		
Date Request Raised	29/09/2010	Originating Request	DR 1023

Detail of Request

Reason for Request

It was agreed at harmonisation that NI Suppliers will use the Change of Legal Entity (Tenancy) MM 016 instead of MM N013 to advise of a Change of Legal Entity (CoLE). Suppliers will be able to, but are not required to submit readings as part of the CoLE. The Required Date, if provided, is taken to be the move-in date for the new tenant. If the required date is omitted or predates the last DUoS bill then the message date will be taken as the move-in date. Readings, if provided, will be processed as move-out readings dated on the day before the required date. Readings will be validated and processed for settlement if valid and advised to the Supplier using message 300. Readings are ignored in the following circumstances: (a) The required date is not provided or is in the future; (b) The Meter Point is unmetered or is interval metered. This will not prevent the CoLE. Where the required date is more than <to be agreed> into the future, then NIE will review the required date. Where NIE is informed of a CoLE using MM 016 and readings are not provided or fail validation, NIE would not estimate readings as the change is not relevant for settlement or DUoS billing.

Further harmonisation

Proposed Solution

This Discussion Request proposes to allow the estimation of readings for MM 016 which will be settlement relevant and communicated to Suppliers through MM 300.

For NI for Non Interval the CoLE will be effective for the required date (with a validated reading or with a system generated estimate) provided that it does not pre-date the date of the last scheduled or non-scheduled DUoS billing for the given MPRN. Should the required date be on or pre-date the last DUoS billing date, the CoLE will be effective from the message received date to a system-generated estimate. Additionally, should no required date be provided, then the CoLE will take effect from the message received date to a system-generated estimate.

Readings on MM 016 for Interval will be ignored.

Estimate reads are used where the CoLE move in date is greater than the current date.

Where a periodic read exists on move in or move out date, it will be used as the CoLE read rather than any read supplied by the Supplier.
