Detail of Change Request

The 'Economic Activity Indicator' codes currently defined in Ver 4.1 of Data Codes include a mixture of 2, 3 and 4 digit codes.

While continuing to base the codes on the NACE standard it is proposed to make the following revisions

- Published codes to use NACE Codes at 2 digit level only. This provides suppliers with the flexibility to use 2 and 4 digit codes as appropriate on their own systems but when it comes to sending and receiving Market Messages the first 2 digits only will be sent.
- The attached is a list of 2 digit codes is proposed

Reason for Change Request

Lack of uniformity in current list of 'Economic Activity Indicator' codes could lead to inconsistent interpretation of market messages and limited flexibility of Suppliers to use extended set of codes on internal systems
