303R - Customer Read rejection

Serial number at the Meter Id Level (Level 3) should be D not M on message 303R.

Reason for Change Request
<p><u>016 Change of Legal Entity</u></p> <ul style="list-style-type: none"> • Currently if there was no read reason populated, even if read data was not provided, the message would fail initial validation which is incorrect • The meter sequence number is not required when there is only one meter point installed at the MPRN. Therefore this number will only be mandatory in defined circumstances. Unless a change is made, where the Serial Number is not populated and there is only one meter at the MPRN a plausible read may be rejected, which could be used by Networks. <p><u>Change to Optionality of 'Country- Ireland' field on Notification Address</u></p> <ul style="list-style-type: none"> • Current design unnecessarily restrictive <p><u>Change to Optionality – 'Street, 'PO box Number' and 'Country' fields of Notification address 'Country' field of Technical Contact Address</u></p> <ul style="list-style-type: none"> • Current design unnecessarily restrictive. <p><u>303R - Customer Read rejection</u></p> <ul style="list-style-type: none"> • If this change were not applied then most 303R messages being sent would fail IDE validation as Serial number is not mandatory on 010 or 210 and these messages will not have this field populated in many cases
