<b>Date Change Request Raised</b>	<i>05/04/2005</i> <i>Revised –</i> <i>05/05/2005</i>	<b>Originating Discussion Doc</b>	<i>DR 0056</i>

### Detail of Change Request

DR 0056 was raised to address the issue of Suppliers requirement to receive an estimate of consumption for each register for non standard MCCs.

There was a conference call held on 03/03/05 to clarify business requirement where it was agreed that:

- No changes will be made to any other market messages (e.g. 332, 105 or 320 W)
- Responsibility for on going updates to the estimate of annual consumption at register level based on actual consumption resides with the Supplier
- The sum of the estimates of annual consumption for all registers at a given timeslot will not necessarily equal the EUF for the timeslot

The change proposed to the message is to add the field 'Estimate of Consumption' to the Register Level segment of the 320 as follows:

Register Level  
information - Level 4

Meter Register Sequence	M	1..N
Timeslot	M	
Unit of Measurements	M	
Meter Multiplier	M	
Reading	M	
Read Reason	M	
Read Type	M	
Register Type	M	
Pre Decimal Digits	M	
Post Decimal Digits	M	

*Estimate of Consumption*    *O*        *To be provided for the non MD registers of all MCCs*

Estimate of Consumption is to be defined as a *Num (15,3)* field with the following Business Data Definition:

An estimate of the annualised consumption at non MD registers provided for all MCCs in the Change of Supplier scenario only
