Detail of Change Request
<p><u>Background:</u></p> <p>There are a small number of sites where a duplicate MPRN has been set up and registered to a supplier and this has occurred because, as part of an increased connection process at the site or the wrong Service Product was applied in Networks ISU and a second MPRN was created for the site that was subsequently energised. There is a requirement to de-register and terminate these duplicate MPRNs as and when they are identified by Market Participants and this Working Practice was developed to establish a common procedure between ESB Networks and Suppliers to de-register these sites.</p> <p>Working Practice 0013 originally issued from RMDS, and was discussed at the IGG Meeting held on 21st September 2006 where a number of issues were raised by Market Participants.</p> <p>Working Practice 0013 v1.0 was circulated to Market Participants on 2nd November 2007 and following feedback from one participant, a note has been included in step 6.</p> <p><u>Note:</u></p> <p>Validations have been implemented in Networks ISU in June 2005 to stop users selecting invalid Service Products when processing quotations for Increased Connections</p> <div style="text-align: center;">  <p>Working Practice 0013 Termination of I</p> </div>
