<b>Date Change Request Raised</b>	25/10/2006	<b>Originating Discussion Request</b>	
		<b>DR</b>	'Impact of AIP on ROI Retail Market', Draft Ver 0.41'

#### Detail of Change Request

The market design for the Single Electricity Market makes provision for Generator sites with an MEC <10MW that do not wish to be participant within the pool market and, in effect, allows them to make arrangements outside the market for the sale of their generation. This sale is outside the scope of the market design but the mechanism through which it will be reflected will be a netting of this Non Participant Generator Export Data from the Demand that Supplier is registered against. In order to perform the netting, the generation must be attributed to the correct Supplier Unit in advance as per the process shown in MPDs 7 1.1, 7 1.3 and 7 1.5.

This Working Practice sets out the forms for the Distribution Connected Non Participant Generators and Suppliers to communicate their Export Arrangements to the MRSO for implementation.

Detailed changes for Distribution Connected Non Participant Generator Export Arrangements Working Practice WP 0014:-

These changes are described below (from page 4), containing:-

1. WP 0014 Distribution Connected Non Participant Generator Export Arrangements Working Practice

#### Reason for Change Request

Introduction of the Single Electricity Market.

Identification of Retail Market Design Baseline Products Impacted
<p><i>Identification of Retail Market Design Baseline Products Impacted</i></p> <p><b>MPD 7 1.1 New Distribution Connected Non-Participant Generator</b>  <b>MPD 7 1.3 Update Non Participant Generator Export Arrangements</b>  <b>MPD7 1.5. Participant Generator turns Non Participant</b></p>

Reason for Working Practice
<p>The market design for the Single Electricity Market makes provision for Generator sites with an MEC &lt;10MW which do not wish to be participant within the pool market and, in effect, allows them to make arrangements outside the market for the sale of their generation. This sale is outside the scope of the market design but the mechanism through which it will be reflected will be a netting of this Non Participant Generator Export Data from the Demand that Supplier is registered against. In order to perform the netting, the generation must be attributed to the correct Supplier Unit in advance as per the process shown in MPDs 7 1.1, 7 1.3 and 7 1.5.</p> <p>This Working Practice sets out the forms for the Distribution Connected Non Participant Generators and Suppliers to communicate their Export Arrangements to the MRSO for implementation.</p>

Working Practice
<p>Distribution Connected Non Participant Generators who wish to establish Export Arrangements outside of the Single Electricity Market must first establish their relationship with the Supplier Unit to which the export will be netted from by MRSO. The method for proving this is to obtain one Export Arrangement Supplier Consent Form per Export Arrangement. This is set out in Form 2.</p> <p>All details of validations MRSO will undertake are set out in the above MPDs. Note that this process must be followed for New Connections and also to existing Distribution Connected Non Participant Generators who wish to register or amend their Export Arrangements.</p> <p>It should be noted that the Export Arrangements specified will stay in place until one of the following occurs:</p> <ul style="list-style-type: none"> <li>• A nominated Supplier Unit exits the market</li> <li>• The Generator elects to change to a Participant Generator in the SEM</li> <li>• A subsequent Update of Export Arrangements</li> </ul> <p>Even if there is a change to the physical metering configuration on site an Update of Export Arrangements would be required before any change to the nominated Export Arrangements would take effect.</p> <p>The Generator must forward the relevant <b>completed and signed</b> Export Arrangement Supplier Consent Forms, along with <b>completed and signed</b> Request for / Update of Export Arrangements forms (Form 1). Please note the onus is on the Generator to ensure this form is completed fully and clearly. Incomplete requests will be rejected by MRSO and a reply communication will be sent to the Generator <b>only</b> stating the reason for rejection. <b>Please also note that whilst MRSO will distribute Non Participant Generator data it will not be responsible for any payment or financial settlement as a result of any bi-lateral agreements between Market Participants. This will be the responsibility of the Market Participants.</b></p> <p>Please return fully completed forms by Fax, Email or by Post to:</p> <p style="text-align: center;">MRSO  Osprey House,  Grand Canal Street Lower,  Dublin 2</p>
