PART 1 DETAIL OF DISCUSSION REQUEST/MARKET CHANGE REQUEST:							
Requesting Organisation(s)	ESB Networks		Originating Jurisdiction	RoI			
Contact name	Jessica Gregory, RMDS						
Date Request Raised	01/02/2011		Originating Request	DR 1064			
Detail of Request							
Reason for Request							
The current Token Meter technology in use to assist financial hardship customers (also known as Budget Controllers) is due to go out of production, limiting the number of Landis and Gyr Budget Controllers available to suppliers to 38,000. A solution needs to be put in place to facilitate financial hardship customers beyond this limited supply.							
Proposed Solution							
The Working Practice attached to this change request, WP 0019, sets out proposals for how a replacement Keypad Meter solution can be managed without changing core SAP systems or the existing Market Design. Avoiding changing core SAP systems and the Market Design will reduce delays in the delivery of the Keypad Meter solution.							
A copy of the relevant Working Practice is embedded at page 3 of this MCR.
