**METER READING**

**CUSTOMER READINGS**

---

**2010 – 393,000 market messages with customer readings forwarded by Suppliers.**

**2014 - 950,000 market messages with customer readings forwarded by Suppliers.**

**January 2015 – the first time the monthly number of 210MMs has exceeded 90,000.**

**Volume of 210MMs received on 20<sup>TH</sup> FEB was 2,400 of which 600 were implausible – 25%.**

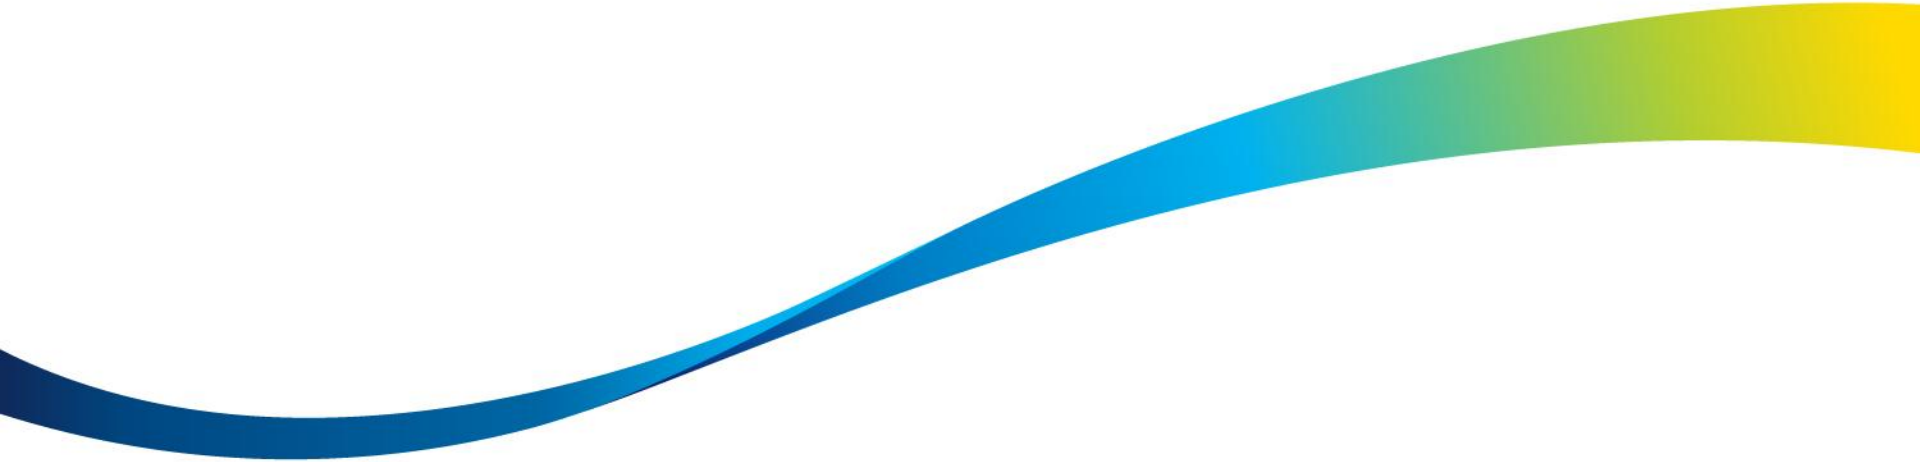

**The running of this daily report once took 2-3 hours – due to hugely increased volumes it is now taking over 10 hours.**

**The large number of implausible readings is causing delays in releasing valid readings.**

**This will eventually lead to delays for Suppliers**

- **There is no evidence to suggest Suppliers are doing any validation of the readings they receive**
  - Can suppliers confirm if they are doing any validation themselves?
- **Suppliers need to ensure obvious implausible readings are not passed on to ESB Networks**
- **If required the meter reading team can provide some information on what a supplier should be looking for in order to prevent an implausible read e.g. customer reading less than the previous actual reading**

**Questions/Comments?**

## **ESBN Presentation to the IGG**

**Sundry Items**

**Theresa O'Neill**

**4<sup>th</sup> March 2015**

## 2 Reads sent in one message to suppliers – Code Correction

- We are planning for a Go-Live on Wednesday 27 May 2015
- No Outage will be needed, the changes can go live during a working day

Thank You
