

Discussion Request 1173			Vulnerable Customers Implementation in Rol of SI 463		
Status	Issued to Market	Priority	High	Status Date	27/04/2016

Date	Version	Reason for Change	Version Status
02/03/2016	1.0	Vulnerable Customers Implementation in Rol of SI 463	Final
27/04/2016	1.1	Following VC Workshop on 14.12.15 and CER decision	Final

Part 1 DETAIL OF DISCUSSION REQUEST / MARKET CHANGE REQUEST			
Requesting Organisation(s)	ESB Networks	Originating Jurisdiction	Rol
Request Originator Name	CER		
Date Raised	27/08/2014		

Classification of Request			
Jurisdictional Applicability	Rol	Jurisdictional Implementation	Both
If jurisdictional implementation is for one jurisdiction only – is the other jurisdiction required to effect any changes?	N/A	Co-Ordinated Baseline Version No.	T B C
Change Type	Schema Impacting		

Detail of Request
Reason for Request
<p>To implement compliance in Rol with SI 463, this Change Request has been drafted for changes that are required in the Rol Retail Market only.</p> <p>Jurisdictional Implementation in the Change Request is flagged as Both due to the COBL, Market Message, Webforms and Schema Impacting elements of this Change Request.</p> <p>All MP’s were invited to VC Workshop held on 14.12.15 to discuss v1.0 of this DR. A unanimous position was not agreed on the PSR (Life/Non Life support). CER adjudicated and provided a decision as to how to progress. Version 1.1 provides a position following the workshop and the CER decision.</p> <p>Summary of Proposed Changes:</p> <ul style="list-style-type: none"> • Capture mental health as a type of vulnerability thus allowing suppliers to register customers under this category. • Create a new category named “Other” on the Special Services Register and introduce this as a “dormant code” which could be activated if the need arose in the future. The purpose of this proposal is to ensure a quick turn-around for introduction into market. • Automate the rejection of disconnection requests for non-payment on account for all vulnerable customers registered on the Priority Services Register (Medical Equipment Special Needs Life-Support and Non-life Support) for all year around • Automate the rejection of disconnection requests for non-payment of account for all vulnerable customers registered on the Special Services Register (Customer Services Special Needs) from 1 November to 31 March

Proposed Solution

1. Current VC Implementation in Rol

At present to identify customers who have vulnerability, Suppliers and ESBN use 7 vulnerable customer Data Codes which are classed under Customer Services Special Needs. These are:

- 0001 Visually Impaired
- 0002 Speech Impaired
- 0003 Hearing Impaired
- 0004 Elderly
- 0005 Language Difficulty
- 0006 Learning Difficulty
- 0007 Mobility Impaired

In addition there are 2 Medical Equipment Special Needs details Data Codes , which currently are:

- 0003 Life Support
- 0004 Non Life Support.

There is a code Medical Institution code 0005 (under MESN above) which can also be selected under certain circumstances.

Currently, Suppliers can not log d/e npa for Life Support customers at any time of the year or for customers flagged as Elderly during the winter months, i.e. 1st November to 31st March. The Market Message 017 is automatically rejected.

Since the introduction of SI 463, ESB Networks manually check d/e npa orders on a daily basis and cancel d/e npa orders that have a Non-Life Support flag (0004). From 1st November to 31st March, ESB Networks also cancel d/e npa orders logged for customers with a CSSN flag.

2. Summary of Proposed Changes:

- Capture mental health as a type of vulnerability thus allowing suppliers to register customers under this category.
- Create a new category named "Other" on the Special Services Register and introduce this as a "dormant code" which could be activated if the need arose in the future. The purpose of this proposal is to ensure a quick turn-around for introduction into market.
- Automate the rejection of disconnection requests for non-payment on account for all vulnerable customers registered on the Priority Services Register (Medical Equipment Special Needs Life-Support and Non-life Support) for all year around
- Automate the rejection of disconnection requests for non-payment of account for all vulnerable customers registered on the Special Services Register (Customer Services Special Needs) from 1 November to 31 March
- Include PSR (for life and non life) and SSR (for existing customer service special needs) as labels on the extranet. Medical institution must be listed as a third category label.
- 2 of the 5 Downloadable Meter Point Files will be updated to reflect new codes, addition of Medical Institution

3. Detailed changes proposed

3.1 Registers:

SI 463 references PSR (Priority Services Register) and SSR (Special Services Register). These terms are to be introduced into the CMS terminology and will be referenced on the extranet and used interchangeably with Customer Service Special Needs (now SSR) and Medical Equipment Special Needs (now PSR)

3.1.1. RoI Special Services Register (SSR)

Changes must be made to reject all de-energise NPA requests from 1st November to 31st March for all Vulnerable Customers which are classified in the SSR. There will be ten classifications. The **SSR for RoI** will be populated by using the **Customer Service Special Needs Details** Data Codes which will indicate the type of special needs that a customer has.

Customer Service Special Needs Details Data Codes that will be valid for use for Vulnerable Customers who are on the RoI SSR

These are the ten SSR code values that will be valid when this Change Request is implemented:

- 0001 Visually Impaired
- 0002 Speech Impaired
- 0003 Hearing Impaired
- 0004 Elderly
- 0005 Language Difficulty
- 0006 Learning Difficulty
- 0007 Mobility Impaired
- 0008 Dexterity Impaired
- 0009 Mental Health
- 0010 Other

- **New code 0010 Other** will be included into the schema but will not be available for selection by MP's. The provision of the "other" code is to enable market use of an additional code should the need arise in the future. Inclusion in the schema now means that a separate schema release for introduction of a code will not be necessary at the time. This will allow for a quicker turn around. It was decided that the code was not to be available immediately as could lead to confusion and inaccurate use. If this code is used before formal market agreement, it will be captured in the CMS but will be picked up through the reconciliation exercise. MPs who have used the code will be non compliant with the market design and therefore will be requested immediately to stop using the code 010. It will be included in web forms but not available for selection. The coding and provision of the 010 code must follow the same CMS logic as for Mental Health code.
- **New code 0009 Mental Health** will be included into the schema and available for selection in ROI only.
- **MCR 1096 – facilitates the inclusion of 008 Dexterity Impaired** to the list of available ROI items. This is currently available in NI and will need to be allowed for ROI. Whether MCR 1096 changes are aligned with this MCR or whether included here will be determined as part of schema release.

In general and unless otherwise documented, the implementation for the SSR will stay as-is via the use of the CustomerServicesSpecialNeeds segment in Market Messages 010,016,017 with its field CustomerServicesDetailsCode, and the deletion or addition of one or multiple via the SpecialNeedsDeleteDetails segment on the 013 Market Message with its fields DeleteCustomerServiceDetails Flag and CustomerServicesDetails Code. This means for example that it will still be possible for a Supplier to add one or multiple SSR code values onto the one MPRN on one MM010,013,016,017, and to delete one or multiple SSR code values from the one MPRN on one 013MM.

3.1.2. RoI Priority Services Register (PSR)

Codes that will be valid for use for Vulnerable Customers who are on the RoI PSR

Changes must be made to reject all de-energise NPA requests at any time for all Vulnerable Customers which are classified in the PSR. The proposal is to retain the Life/Non Life Support codes which become representative of a customer on the PSR. That is any customer marked as either Life/Non Life will belong to the PSR. The retention of the life/non life distinction is required by ESBN to facilitate customer service offering during storms and outages. Existing functionality relating to Life/Non Life will remain:

- The codes are exclusive – only one can be selected per customer.
- The codes will remain in the Medical Equipment Special Needs Details Data codes fields

- One of the 2 codes can be added to a customer record via 010, 016, 013, 017
- Explicit removal of a code is possible via 013
- Webforms will remain the same

3.2. Retail Market Participant Extranet

The Retail Market Participant Extranet will need to be changed.

- The RMP Extranet will need to be changed to allow for the population of the new SSR codes which will become valid for Rol viz
 - 0008 (Dexterity Impaired), 0009 (Mental Health),
- The RMP Extranet will need to continue to be able to populate the SSR codes which are currently valid for Rol viz
 - 0001 (Visually Impaired), 0002 (Speech Impaired), 0003 (Hearing Impaired), 0004 (Elderly), 0005 (Language Difficulty), 0006 (Learning Difficulty), 0007 (Mobility Impaired)
- The extranet must reference through a label the term SSR and allow one or many of the existing Customer Service Special Needs Codes to be displayed. The same must apply for PSR where a label must be provided and allow for display of life or non life (where MP has agreed to show).
- Medical Institution code 0005 (Medical Equipment) must be referenced as a separate heading to codes under label PSR or label SSR.

Note existing field locations on the RMP Extranet may need to change and therefore the exact location of the new SSR and PSR lists on the Extranet screens will be communicated during the implementation phase.

3.3. Downloadable Meter Point Files.

Two of the five Downloadable Meter Point files viz **DOMS_CUST** and **COMM_CUST** are proposed to be changed to accommodate the existing and new SSR values, as well as retaining an ability to display the Medical Institution Code 0005. A new Display on Extranet Field is proposed to be added to the domS_CUST. In summary the downloadable meter point files must follow the VC display logic which is in place for the RMP Extranet.

Key changes proposed are :

domS_CUST Downloadable Meter Point Detail File

- Change the structure of the domS_CUST Downloadable Meter Point Detail File and allow for the population of up to 10 SSR Data Code values
- Change the population of the domS_CUST Downloadable Meter Point Detail File so that it is based on the content of the Display on Extranet data field.
- Add an extra column 'Display on Extranet' and where it exists at the meter point then populate this new field in the downloadable file with either Y or N. If it does not exist at the meter point then this field is not populated in the downloadable file.

COMM_CUST Downloadable Meter Point Detail File

- Change the structure of the COMM_CUST Downloadable Meter Point Detail File to allow the population of one coded value i.e. 0005 (Medical Institution)

3.4. Webforms.

Webforms for Rol will need to be changed to accommodate the new Customer Service Special Needs Details

Customer Service Special Needs Details Webforms 010,013,016,017

- Existing Customer Service Special Needs Details which are currently Valid in NI but Not Valid in RoI will be changed in the Webforms list of values on the Special Needs tab to become Valid in RoI as well as remaining Valid in NI:
 - 0008-Dexterity Impaired
- New Customer Service Special Needs Details which will be added to the Webforms list of values on the Special Needs tab to become Valid in RoI but not NI:
 - 0009-Mental Health
 - 0010-Other (must not be able to be selected – therefore must be hidden but must be included so can be used easily if required in future)

3.5. CMS

SSR

Customers who are registered as SSR can not be De-Energised NPA from 1st November to 31st March. This means that changes are needed so that Market Message 017 for De-Energised NPA will be rejected by the Central Market System whenever it is received from the Registered Supplier with a De-energise (NPA related) Meter Point Status Reason code D02 from 1st November to midnight 31st March for all Vulnerable Customers which are classified in the SSR. The Reject Reason Code will be IA. This change will be automated.

PSR

Customers who are registered as PSR can not be De-Energised NPA at any time. This means that changes are needed so Market Message 017 for De-Energised NPA will be rejected by the Central Market System whenever it is received from the Registered Supplier with a De-energise (NPA related) Meter Point Status Reason code D02. The Reject Reason Code will be IA.

The CMS must change to automate the rejection of 017 for de-energisation. .
This process must change from manual to automated.

Scope of Change

Jurisdiction	Design Documentation	Business Process	DSO Backend System Change	MP Backend System Change	Tibco	Supplier EMMA	Schema	Webforms	Extranet/NI Market Website
ROI	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
NI	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Co-Ordinated Baseline Market Design Documents Impacted by Request

Market Messages

Message No.	Message Name	CoBL	ROI	NI
010	Registration Request	See Below	See Below	TBD
013	Customer Details Change	See Below	See Below	TBD
016	Change of Legal Entity	See Below	See Below	TBD
017	Meter Point Status Change Request	See Below	See Below	TBD
101	New Connection Registration Acceptance	See Below	See Below	TBD
105	Change of Supplier Confirmation	See Below	See Below	TBD

Data Definitions

The Data Definitions for three Data Items will be changed as follows

- **Customer Service Special Needs Details** will change from 'A code indicating the type of special needs that a customer has' to 'A code indicating the type of special needs that a customer has and for ROI this is known as the Special Services Register (SSR)'
- **Medical Equipment Special Needs details** from 'A code indicating the type of medical equipment special needs that a customer has' to 'A code indicating the type of medical equipment special needs that a customer has and for ROI this is known as the Priority Services Register (PSR). Note: there is one exception of a Medical Equipment Special Needs details code value which is valid for ROI but is not a PSR value viz Medical Institution code 0005'

Display on Extranet from 'A Boolean message flag to indicate whether Life/Non Life support ~~Life/Non life support flag~~ should be displayed on the ROI MP Extranet' to 'A Boolean message flag to indicate whether the Priority Services Register code(s) for the MPRN should be displayed on the ROI MP Extranet and the domS_CUST Downloadable Meter Point Details File' Life, non life must remain as coded values on the extranet but must be under heading PSR

Data Codes

Customer Service Special Needs Details

- Existing Customer Service Special Needs Details which are currently Valid in NI but Not Valid in ROI will be changed in the COBL Data Codes to become Valid in ROI as well as remaining Valid in NI:
 - 0008 Dexterity Impaired
- New Customer Service Special Needs Details which will be added to the COBL Data Codes to become Valid in ROI but not NI:

- 0009 Mental Health
- 0010 Other
- Medical Equipment Special Needs details will be Retained in the COBL Data Codes and the Schema:
 - 0003 Life Support, 0004 Non-Life Support, 0005 Medical Institution

See embedded document for full list of COBL Data Code changes 

Schema Changes

As a result of the Data Code Changes, the following changes will need to be made to the schema

- the addition of 0009 and 0010 to the list of enumerated values for the **CustomerServiceDetailsCode**

Market Message Implementation Guides

ROI	Yes/No	NI
Rol - Customer and Data Agreements	Yes	TBD
Rol - Meter Registration	Yes	
Rol - Meter Works	Yes	

Market Message Implementation Guides should be updated as relevant based on sundry changes identified throughout in this document

Comments

MCR1096 *Customer Service Special Needs – expansion of ROI code set to align with NI practice* is an approved Market Change Request. The assumption when drafting this Change Request is that MCR1096 will be superseded and the requirements in it will be incorporated in this Change Request. Therefore the value 0008 "Dexterity Impaired" is included as a Customer Service Special Needs Details Data Code which will be made available for use in Rol by this Change Request.

The definition of Mental Health is outside of the scope of this Change Request.
