ESB Networks I-SEM Programme

Presentation to the IGG

Theresa O'Neill & James Long

31st August 2016

We continue to work on gathering Requirements with the RA's , the I-SEM Project and the other Meter Data Providers through the I-SEM Metering Working Group.

Price Effecting Units

We have been working with Eirgrid to identify Price Effecting Units that will move from Eirgrid to ESB Networks, and together with SEM-O we will be considering the cutover implications and the timeline for their moving in more detail.

New! SEM-O are looking at moving a small number of Supplier Units that are currently Non-Price Effecting in the SEM to become Price Effecting in the SEM , and we are working with them, along with MRSO and Eirgrid to understand the implications and timelines involved.

When information is available, we will share it.

At the last IGG there was an update on a Wholesale Market Modification around the timeline for the last SEM Re-Settlement . There was a proposal to reduce the re-settlements of the SEM market at M+4 instead of the usual M+13.

The latest update on that is that the M+13 Re-Settlements for the SEM are expected to run on until the last day of the SEM is Re-aggregated.

The Market Operator has instead decided to raise a second Modification around the dispute process after M+13 with a reduction from 24 months to a yet to be determined new value. This concerns the SEM market.

At this time there is no change to our understanding from what we presented at the last two meetings viz

- No Changes are indicated to the Harmonised Retail Market Schema or the COBL
- D+1,D+4,M+4,M+13 Settlements will operate for ESN for the I-SEM i.e. No Change to frequency
- Need to concurrently operate the SEM and the I-SEM until the Re-Settlement of the SEM has completed
- No Meter Data will set the price in the I-SEM and so I-SEM will not need the Price-Effecting category
- I-SEM Market Trials will run from June-Sept 2017
- The Go-Live date for the I-SEM is 1st Oct 2017

Discussion Request DR1182 has been drafted , for your consideration , and for discussion today.

If you have any follow-on queries, we can be contacted via the RMDS mailbox.

Thank You
