For Approval Today

ReMCoSG Update

SG Meeting held on 24th August 2016

Topic	Detail	Action Item	Status
Smart Metering	<ul style="list-style-type: none"> Currently in the Replan Process. CER has had productive engagements with all NSMP stakeholders, such as ESBN and GNI and has also been in contact with DC&R, Eirgrid and SEAI. CER is working closely with ESBN and GNI to collate all the MPDs and to formulate an End to End Programme Plan. CER will have an update at this Forum.	105 Incorporating Smart changes into the Co-Ordinated Retail Markets - this action is being retained as a standing item/placeholder	pre-existing
I-SEM	<ul style="list-style-type: none"> Currently all I-SEM Workstreams are on track. The latest Quarterly I-SEM update was published on the All Ireland Project Website. Both the CER & ESBN will have an I-SEM update at this Forum		
TIBCO/Schema Programme	P Mallon provided the ESBN/NIE Networks TIBCO Project update. He outlined slides on the following: <ul style="list-style-type: none"> Project Plan, Message Volumes processed, Cut-Over, Hypercare Period, Next Steps including Market Assurance Recommendations and Retail Market IT Program. •1 New Action was logged. Action 136: CER/UR to agree on how they want to receive the outcome of the TIBCO recommendations	136 CER/UR to agree on how they want to receive the outcome of the TIBCO recommendations	New
Co-Ordinated Retail Market Plan	<ul style="list-style-type: none"> All agreed that Action 135 should remain open as this Action is currently with the UR who are yet to revert to the CER with their position on the proposal produced by ESBN and NIE Networks. IT was proposed that ROI goes ahead with the working assumption to follow the plan which would include a schema release in 2018. CER would be required to formally support this approach. It would have to be acknowledged that the UR decision may impact the current working assumption. This may or may not lead to a change in the plan for a 2018 release. 	135 CER/UR to provide a decision around the future Co-ordinated Market Priorities and deliveries of such	Open

ReMCoWG Action Items

➤ 2 Actions were closed since last ReMCoWG meeting

AP No.	Title	Org. Assigned to	Date Closed
140	Disaster Recovery – ReMCoDS to issue a note to Suppliers requesting them to provide a contact name & details (email & phone no.) for the Disaster Recovery Meeting to be organised by Secure. Suppliers to respond to ReMCoDS with contact details.	ReMCoDS/Suppliers	29/06/2016
141	ESBN/NIE Networks to request from Capita the process for MPs to follow when an MP needs to take their EMMA offline. RMDS to then issue this process to MPs	ESBN/NIE Networks/RMDS	29/06/2016

➤ 2 Actions were opened at the last ReMCoWG meeting & 1 Action Carried Forward

AP No.	Title	Org. Assigned to	Date Due
142	ESBN/NIE Networks to produce a summary report describing the incident of the Unplanned Outage due to Capita building loss of power.	ESBN/NIE Networks	31/08/2016
143	Unplanned Outages - ESBN/NIE Networks to investigate if there is a Contingency/Disaster Recovery for the Hillview site for TIBCO (ROI and NI)	ESBN/NIE Networks	31/08/2016
144	TIBCO Upgrade Project - ESBN/NIE Networks to investigate when Suppliers will receive their End User Licence Agreement. To be escalated at the TUP project board.	ESBN/NIE Networks	31/08/2016

TIBCO Update

Wednesday 31st August, 2016

Agenda

- **Project Plan**
- **Message Volumes processed**
- **Cut-Over**
- **Hypercare Period**
- **Next Steps**

Plan on a Page

- **All billing issues were cleared in advance of Cut Over;**
- **Cut over went as planned and per dress rehearsals;**
- **Suppliers with enterprise IT billing systems - their changes went very well;**
- **Suppliers who did not have enterprise IT billing systems - only had validation checks to carryout;**
 - On Friday night some suppliers did not turn off flow of messages but this was resolved quickly;
 - On Saturday some Suppliers were logged onto their old TIBCO EMMA and reported failed validation. Quickly corrected and logged onto new EMMA and validation completed;
 - Some suppliers had issues with password management on their EMMA but again resolved.

Hypercare Status - 30th August

- Market Message Processing (up to 3am on 30th August)

Market Message Statistics	Current Total
SAP IS-U	
ROI	
Total Sent from SAP IS-U	1,395,766
Total Received by SAP IS-U	157,039

Total Completed	427,168
Total Sent from Suppliers	53,435
Total Messages Processed ROI	1,552,704
Total Messages Processed NI	480,603
Total Messages Processed	2,033,307

*Note:
Reason for
Small
Variations is
fully
explainable.*

Hypercare period

- **2 weeks of Hypercare left provided all going well each week**
- **Project status - Going well and no issues of note**
 - Small event on Thursday 11th night @ 23:30
- **Suppliers EMMAs**
 - Jeopardy management
 - Suppliers IT infrastructure and infrastructure back-ups
 - Supplier knowledge of EMMA operations and their database support varies significantly
- **Market messaging activity is 24 hours a day, every day.**

Hypercare

- Routine daily checks and reporting to continue
- Market Communications will continue during Hypercare period but at a reduced level
- Individual Supplier interactions as required

Project Wrap Up

- Deferred Work Package testing nearing completion
- Lessons Learned workshops and interviews nearing completion
- Project Close Out report nearing completion and Resource roll off progressing

Market Assurance Recommendations

- Agree approach

Co-Ordinated Market Release Summary

CO-MMR

- CO-MMR 10.7 (CoBL version 2.4) – Went live successfully on 02 June 2016

Schema Release 2015

- Went live Successfully on 05 August 2016
 - MCR 1111
 - MCR 1122
 - MCR 1133
- CoBL updated to version 3.0 on 05 August 2016

TiBCO Rewrite Project (TUP)

- Went live Successfully on 05 August 2016
- Hypercare concludes on 16 September 2016

ReMCoDS wants to thank all MP's for their involvement & co-operation for the duration of the TiBCO & Schema release 15. We enjoyed working with you all

Next Schema Market Release (Agreed it will not be 2016, but 2017/2018?)

- Decision as to when the next Schema and Non Schema releases will take place are pending the outcome to ReMCoSG action 135 (CER/UR to provide a decision around the future Co-ordinated Market Priorities and deliveries of such)

DR1180 – New Registrations(1/2)

- ❑ CER have reviewed the New Registration' process for customers who do not actively choose a supplier as part of the new connection process. In the interest of a level playing field and to further support the development of competition, CER are considering a change to the current default process to a single supplier.
- ❑ The core driver from CER is that the default Supplier, for sites which do not elect a supplier within 5 days of energisation, should not automatically be Electric Ireland. This is seen to be an unfair advantage from market perspective. The intention of the change request is to look at the process and develop an equitable process around New Connections which does not give unfair advantage to any one supplier.
- ❑ RMDS recommends that New Registrations would follow a similar process to that which exists for $\geq 30\text{kVA}$ new connections. The customer must sign up with a supplier of choice before energisation. The choice of the Supplier is therefore correctly in the hands of the customer.

DR1180 – New Registrations(2/2)

- ❑ When the quotation letter for a new connection is sent out to the customer by ESNB this should contain a paragraph which will detail the requirement for mandatory selection of a Supplier by the customer in advance of energisation.
- ❑ The difference to the current process is that for sites < 30 kVA the customer will in future have to contact a Supplier of choice who will submit a registration to ESNB with the customer name, and receipt of the registration by MRSO becomes a requirement before the site is energised.

DR1182 – Impact of I-Sem on the Retail Market

- ❑ CER's Retail Market team asked ESB Networks in January 2015 to assess the impact of the ISEM on the Retail Market in Ireland..
- ❑ Whilst the SEM is to undergo a radical transformation arising from changes to European legislation designed to create a single wholesale electricity market across Europe, the intention of the RA's I-SEM team is that there would be minimum impact for the Retail Market and for Meter Data Providers arising from the I-SEM.
- ❑ ESB Networks is one of the four Meter Data Providers represented at the I-SEM Metering Working Group and have been considering the impacts of the I-SEM.
- ❑ The proposed changes are fully detailed in DR1182 and include changes to the Data Processing and the Data Aggregation Retail Market business process between ESB Networks and Market Participants.

Retail Markets Co-Ordination Design Service

DR1183 – 010 Cust Validation Agreement(1/2)

- ❑ Within the retail market, customer agreements must be in place before a 010MM can be submitted. In addition, a ten working day cooling off period must have been completed prior to the submission of the 010MM.
- ❑ Currently there is no definitive facility within the market to validate the existence of a customer agreement and the ten working day cooling off period. The supply agreement flag contained within the MIG for meter registration assumes the existence of the customer agreement. At the request of UR, changes to the 010MM are required to capture the associated customer agreement details.
- ❑ It is proposed to add an additional field to the 010MM which must be populated with the date of the customer agreement

DR1183 – 010 Cust Validation Agreement(2/2)

- ❑ Validation will be required to:
- ❑ Determine that the ten working day cooling off period has been maintained between the date of the customer agreement and the submission of the 010MM
- ❑ Confirm that the date of the customer agreement is not more than 6 weeks prior to the date of the submission of the 010MM.
- ❑ Confirm that the customer agreement is not submitted more than twice. A unique identifier will be required for each customer agreement.
- ❑ A 102 R rejection message will be issued with a new data code which will indicate that the timescales have failed validation.

At Today's Meeting:
