

Date:	22 nd May 2018	Time & Location	12:00 – 12:30 – City North Hotel – Gormanston - Co Meath
Chair:	Carl Murphy - RMDS		
Attendees:	Name	Location	
	Alice Mooney, Catherine Keane	RMDS	
	Alan Keegan	CRU	
	John Bracken, Aileen Greaves, Theresa O'Neill, Colette Roper	ESBN	
	Thomas Heasley	Power NI	
	Mark Speers	BGE	
	Kevin Sheridan	Energia	
	Siobhan Melvin	SSE Airtricity	
	Eamonn Murtagh, Alan Reynolds	Panda Power	
	Bronagh Needham	Flogas	
	Sean Doolin, Mark Phelan	Electric Ireland	
Apologies:			
Version Number	1.0		
Status	Draft		

Agenda:	
1.	Introduction/Background
2.	Objective for Today
3.	MCR Evaluation
4.	MCR Evaluation Re-Cap
5.	Next Steps

1 - Introduction/Background

C Murphy outlined the Introduction and background to the new Retail Market Release Prioritisation Process.

Refer to slides for details.

The Retail Market Release Prioritisation Process was developed based on principles agreed with both CRU and UR and was approved by the RAs on 26th April 2018.

Prioritisation Process Overview

He outlined the Prioritisation Overview.

Evaluate MCRs Process

C Murphy noted that this Workshop (Step 5) is part of the first sub Process “Evaluate MCRs”. MPs were asked in the last couple of weeks (Step 4) to review the MCRs List for Schema Affecting MCRs ahead of this Workshop.

He added that the objective of this sub process is for attendees to review the current list of outstanding approved MCRs and only bring forward the MCRs that are still appropriate and therefore reduce the pot of MCRs. A number of MCRs have been opened for a considerable length of time and it will be for the attendees to determine if this functionality is still required.

Propose Packages for delivery Process

This sub process is whereby the Network Operators impact assess and together with the RAs agree Package Options. Package Options will then be outlined to Suppliers at a further workshop. (See Section 5 Next Steps for details).

Agree Package for delivery Process

This sub process is whereby MPs will have the ability to vote for the Package Options as outlined by the NOs and RAs, (See Section 5 Next Steps for details).

2. Objective for today

C Murphy outlined the Objective for this Workshop.

Refer to slides for details.

The objective of this workshop is to classify each MCR by consensus as either of the following:

- **Included for prioritisation** - Has a Significant improvement for all Suppliers and/or Network Operator(s) in terms of increased efficiency, reduced transaction time, reduced work effort and/or compliance. These will be brought forward for Network Operator Impact assessment.
- **Not included for prioritisation** - Is not immediately required as the market has functioned without its implementation to date satisfactorily without significant additional impact on MPs. These will not

be brought forward for the Network Operator Impact assessment for this release but if a synergy is identified it may be included in a package option.

- **Withdrawn** - MPs agree that this MCR is to be assigned a permanent classification of "Withdrawn". If a similar requirement arises in the future a new DR shall have to be raised.

This Workshop will avoid a deep dive into the detail of each MCR and the deliverability of each MCR will not be discussed. If consensus is not reached on any MCR at this Workshop, then it will automatically be "Included for Prioritisation".

3. MCR Evaluation

C Murphy reported that all Approved ROI Non Schema Affecting MCRs are included in this Workshop for classification. MCRs which have already been scheduled or those MCRs yet to be approved are outside the scope of this Workshop.

He outlined the following 2 MCRs for discussion. A third MCR MCR1185 Self Supplier Categorisation was originally sent out to MPs. However as it hasn't been approved by CRU, it will not be discussed at this Workshop.

- MCR0062 – New Rule for MPD1 Change of Supplier.
- MCR1135 – Market Web Service.

The detailed discussion is outlined below:

MCR0062 - New Rule of MPD1 Change of Supplier.

C Murphy outlined the date raised, date approved, requesting organisation, jurisdictional implementation, version history, prioritisation history and change summary for this MCR.

This MCR was originally raised by Airtricity back in 2005. It was rated low in the last number of prioritisation exercises and wasn't included in the last prioritisation Exercise in 2017.

S Melvin reported that this MCR may be addressed in the LTCA Workshops which are currently underway. She recommended that this MCR is not included in this prioritisation exercise.

Attendees agreed that this MCR should not be included in this prioritisation exercise. It will be kept in the pot and will be available for review in future prioritisation exercises.

MCR0062 – Classified as “Not Included for Prioritisation”.

MCR1135 - Market Web Service.

C Murphy outlined the date raised, date approved, requesting organisation, jurisdictional implementation, version history, prioritisation history, change summary and notes for this MCR.

This MCR was originally raised by Energia in 2013. It has rated consistently in the top three in the last

number of prioritisation exercises. In 2017, it rated 1st of 8 MCRs by MPs.

Attendees discussed this MCR and all Suppliers agreed that this MCR is still their first choice MCR for prioritisation going forward. All Suppliers stated that this functionality would bring efficiency in the Market. It is currently operational in NI and in GNI. All were in favour of including this MCR for Prioritisation.

MCR1135 – Classified as “Included for Prioritisation”.

4. MCR Evaluation Re-Cap

C Murphy provided a Re-Cap of the MCRs. The following classifications were agreed at the Workshop:

MCR Title	Classification Agreed
MCR0062 – New rule for MPD1 Change of Supplier	Not Included for Prioritisation
MCR1135 – Market Web Service.	Included for Prioritisation

5. Next Steps

C Murphy outlined the next Steps in line with the approved Retail Market Prioritisation Process.

- Evaluation MCR Workshop Meeting Minutes and classifications will be circulated by RMDS by 24.05.2018.
- The Classification will be confirmed by MPs by 31.05.2018.
- The Proposed Package for Delivery Process Commences:
 - Communication Pack will issue to MPs by week ending 27.07.2018.
 - Communication Workshop to be scheduled for early August.
