Detail of Request
Reason for Request
<p>Background</p> <p>When there is a discrepancy in the reconciliation process the solution to identify the missing message(s) is quite cumbersome. Currently the 602 MM provides the type and count of messages sent/received between 03:00 am yesterday to 03:00 am today but no further details of the unique messages sent / received.</p>

Proposed Solution
<p>ESB Networks/NIE Networks provide a list of successfully transmitted inbound and outbound TrxRefNums per message type.</p> <p>Ideally, this information would be included in the 602MM but a daily file would also suffice.</p>
