

Market Change Request 1157			Smart Metering Data Processing and Data Aggregation		
Status	Approved	Priority	High	Status Date	20/03/2019

Date	Version	Reason for Change	Version Status
24/06/2015	2.0	Converted to MCR	Final
25/01/2019	3.0	2018 Smart MCR/DR Re-Versioning Activity	Final

Part 1 DETAIL OF DISCUSSION REQUEST / MARKET CHANGE REQUEST			
Requesting Organisation(s)	ESB Networks	Originating Jurisdiction	RoI
Request Originator Name	Michael Moloney		
Date Raised	04/02/2015		

Classification of Request			
Jurisdictional Applicability	RoI	Jurisdictional Implementation	RoI Specific
If jurisdictional implementation is for one jurisdiction only – is the other jurisdiction required to effect any changes?	Yes	Co-Ordinated Baseline Version No.	tbc
Change Type	Schema Impacting		

Detail of Request
Reason for Request
<p>Background</p> <p>The CRU, working closely with the Department of Communications, Energy and Natural Resources (DCENR), established the National Smart Metering Programme (NSMP) in late 2007. In Phase 1, a trial was carried out in order to assess the costs and benefits of smart meters and to inform decisions relating to the full rollout. In July 2012 a decision was announced to rollout electricity and gas smart meters for all residential and small and medium sized businesses. Phase 2 commenced in January 2013 and is broadly composed of a high level design and procurement phase. [CER14046]</p> <p>The Smart Metering High Level Design Decision Paper published in October 2014 outlines the decisions with regard to the high level design stage within Phase 2 with regards to 1) Core Design, 2) Time of Use Tariffs, 3) Presentation of Energy Usage information to consumers and 4) Pay As You Go (PAYG) solution. This next stage is to work through 5 process groups sequentially at MPD and Schema detail level to inform the Detail Design of the ROI Retail Market Design.</p> <p>This 1st DR provides details of the Retail Market Design within the Process Group of Data Processing and Data Aggregation.</p> <p>2018 SMART MCR/DR Re-Versioning Driver</p> <p>The original NSMP Programme plan envisaged a “big bang” delivery of all NSMP functionality for electricity, gas and in-home data Smart services, with an estimated delivery date in 2023. In early 2017 ESNB submitted a revised proposal to the NSMP to CRU, outlining a phased approach to the delivery of Smart Metering and the NSMP High Level Design (HLD). The proposal foresees delivery over three distinct phases.</p> <p>Phase 1 delivers the installation of 250,000 Smart Electricity Meters by the end of 2020 (Meter installation is expected to begin prior to August 2019). With the Market Schema Release delivered at the end of 2020, all system, business and market changes will have been completed to allow 30-minute interval data to flow to Suppliers via the Market Systems and for Interval Data to be used in all market processes including DUoS Billing and Market Settlement Aggregation. Smart Pre-Payment services without remote de-energisation/energisation can also begin after this phase and Suppliers will have the ability to offer new Time-of-Use based tariffs to their customers.</p> <p>Phase 2 delivers the installation of an additional 1 million Smart Electricity Meters by the end of 2022.</p>

With the Market Schema Release at the end of 2022, all retail market use cases requiring remote and local operation of the service switch in Smart Electricity Meters will be enabled. Smart Pre-Payment services with remote de-energisation/energisation can begin after this phase.

Phase 3 delivers the installation of an additional 1 million+ Smart Electricity Meters by the end of 2024. Along with the Market Schema Release at the end of 2024, Gas Smart Metering Services and In-Home Data Services will be enabled. The installation of Smart Gas Meters and In-Home Display devices can begin after this phase.

This Phased Approach proposal has been positively received by CRU and Energy Suppliers and now forms the basis of ESB's plans and assumptions in respect of the NSMP. The CRU approval of the phased approach was publically announced in September 2017.

NSMP Programme is currently progressing through Phase 1, and it is within this phase that the SMART MR/DR re-versioning activity is being carried out.

Proposed Solution

The scope and content of the proposed changes, involving changes to Market Messages, Data Items, Data Definitions and Data Codes, would not conveniently be described directly in this DR document. Rather, the details are contained in the **embedded Presentation Pack and linked** amended Design Documents (with track changes).

Scope of Change

Jurisdiction	Design Documentation	Business Process	DSO Backend System Change	MP Backend System Change	Tibco	Supplier EMMA	Schema	Webforms	Extranet/NI Market Website

Co-Ordinated Baseline Market Design Documents Impacted by Request

Market Messages

Message No.	Message Name	CoBL	ROI	NI
303R	Customer Read Rejection	Impacted	Impacted	No Impact
305	Non Settlement Estimates	Impacted	Impacted	No Impact
322	DUoS Billing Cycle Notification	Impacted - new	Impacted - new	No Impact
341	Import Interval Meter Daily Readings	Impacted	Impacted	No Impact
342	Export Interval Meter Daily Readings	Impacted	Impacted	No Impact
343	SMART Import Interval Meter Daily Readings	Impacted - new	Impacted - new	No Impact
345	SMART HH Cumulative Register Readings	Impacted - new	Impacted - new	No Impact
352R	Special Reading Request Rejection	Impacted	Impacted	No Impact
592	SMART Interval Import Aggregation	Impacted - new	Impacted - new	No Impact

Data Definitions

DUoS Billing Frequency - Duos Billing Frequency is a code that indicates the frequency of Duos billing at the meter point

Duos Billing Cycle - Duos Billing Cycle Day refers to the day in a 41 working day cycle (ROI) that a Half Hourly meter is due to be Duos Billed

Data Codes

MM305 – No read code – 98 Comms not available

MM343 – Register Type code - 70 Import HH kW

~~MM343 – Register Type code – 71 Import HH kVAh~~

MM345 – Register Type code - 74 Import 24hr kWh

~~MM345 – Register Type code – 75 Import 24hr kVAh~~

MM303R – Reject Reason - IRI Invalid Request Half Hourly site

MM303R – Reject Reason - RIR Remote Site Invalid Read

MM352R – Reject Reason - IRI Invalid Request Half Hourly site

Register Type Code on MM208, MM210, MM300, MM300S, MM300W, MM303R, MM305,

70 Import HH kW

74 Import 24hr kWh

78 Day Off Peak

79 Night Off Peak

80 Peak

Timeslot Code on MM208, MM210, MM300, MM300S, MM300W, MM305, MM303R,

01D 08:00-17:00 & 19:00-23:00 Day Consumption

01N	23-08 Night Consumption
01P	17:00-19:00 Peak Consumption
MM341 , MM342 , MM343 , MM345	
MM341 , MM342 Metering Interval – 15 15 minutes	
MM343 Metering Interval – 30 30 minutes	
MM345 Metering Interval – 24 24 hr Cumulative Register End of Day reading	
Metering Interval data definition – amended.
