Status	Issued to Market	Priority	High	Status Date	20/10/2021

Date	Version	Reason for Change	Version Status
15/06/2018	1.0	Issued to Market	Final
28/06/2018	1.1	Re-versioned to include proposed solution as discussed at last forum.	Final
06/01/2018	2.0	Converted to MCR	Final
15/09/2021	3.0	Re-versioned by ESBN to capture change in delivery mechanism to be via Market Messages	Final
20/10/2021	4.0	Re-versioned by ESBN to capture additional feedback from Market Participants	Final

Part 1 DETAIL OF DISCUSSION REQUEST / MARKET CHANGE REQUEST

Requesting Organisation(s)	SSE Airtricity	Originating Jurisdiction	RoI/NI
Request Originator Name	Lino Govindoorajoo		
Date Raised	07/06/2018		

Classification of Request			
Jurisdictional Applicability	RoI	Jurisdictional Implementation	RoI Specific
If jurisdictional implementation is for one jurisdiction only – is the other jurisdiction required to effect any changes?	N/A	Co-Ordinated Baseline Version No.	tbc
Change Type	Non-Schema Impacting		

Detail of Request
Reason for Request

Background

When there is a discrepancy in the reconciliation process the solution to identify the missing message(s) is quite cumbersome.
Currently the 602 MM provides the type and count of messages sent/received between 03:00.00 am yesterday to 02:59:59 am today but no further details of the unique messages sent / received.

Proposed Solution

A new market message (603MM Daily Summary Transaction Details) will be created to provide Market Participants with the following

- the Transaction Reference Number for each market message type contained in the overall 602MM count.
- A Multiple Identifier Number that will identify the number of 603MMs sent within the time period e.g. 1 of 1, 1 of 2 etc*.

*Note: Market Participants with very large market message volumes may receive multiple 603MMs for the same time period. This is to ensure that the 603MM size does not cause any processing difficulties. Where multiple 603MMs are being delivered this will be identified in each 603MM e.g. 1 of 2, 2 of 2 etc. This limit will be defined during implementation, but it is expected that most Market Participants will receive a single 603MM.

The 602MM will be amended to also include:

- the Transaction Reference Number for each market message type contained in the overall count.
- A Multiple Identifier Number that will identify the number of 602MMs sent within the time period e.g. 1 of 1, 1 of 2 etc*.

*Note: market participants with very large market message volumes may receive multiple 602MMs for the same time period. This is to ensure that the 602MM size does not cause any processing difficulties.

Where multiple 602MMs are being delivered this will be identified in each 602MM e.g. 1 of 2, 2 of 2 etc. This limit will be defined during implementation, but it is expected that most market participants will continue to receive a single 602MM

The 602MM will continue to include a summary of message counts.
